Our wide range of blinds

Roller Blinds

Our quality Custom-made Roller Blinds are available in many fabric and colour variations. Whether you want to screen the sun without spoiling your view, have privacy with filtered light or have total Blockout you will find the perfect solution here at Blinds on the Net. Our Roller Blinds can be ordered as Dual Blinds, Linked Blinds and with the choice of extremely affordable Wired or Wirefree Remote controlled Motorisation. If you need Custom Made roller blinds in a hurry a selection is available with a superfast **5 day despatch** in our **Australian Custom Express** section.

Roman Blinds

For those that prefer a more decorative solution than a Roller Blind, Custom-made Roman Blinds may be the answer. Our Roman Blinds are available in virtually all of the same fabrics but have a softer more classic look. You can choose a cord-operated Blind with a quality cord lock or a superb chain operated mechanism at no extra charge. Roman Blinds from Blinds on the Net have the best mechanisms at the best prices.

Aluminium Venetian Blinds

Perfect for those wanting a versatile Blind that allows easy control of light and privacy, Aluminium Venetians are the inexpensive option. Our 25mm blade comes in a large range of plain colours and wood grain look. Our 50mm blade gives a great Retro look with increased visibility, add the wide cloth ladder tape option for a really stylish finish.

Timber Venetian Blinds

The Blinds on the Net Timber Venetian range has all options covered. 50mm Basswood in a large range of colours. 46mm and 60mm Premium Cedar in a range of standard colours as well as the option of Custom Painting for a totally co-ordinated room. All are sourced from sustainable Timber. For the look of Timber but the practicality of a synthetic we offer Greenwood Venetians in both 50mm and 63mm blades, these are perfect for all wet areas and offer the same look for less money.

Ready-Made + Custom-Made

Vertical Blinds

No other Blind can control your outlook like a Vertical Blind. They are the perfect treatment for sliding doors and anywhere you want to have a single blind that totally controls the level of light and privacy both day and night. We offer high quality and contemporary Vertical Blinds utilising only the best mechanisms available. They are available in 89mm and 127mm blade widths.

Pleated and Honeycomb Blinds

Pleated and Honeycomb blinds pull up effortlessly to a minimal stacking height that doesn't cover too much glass interfering with your view. The Honeycomb design forms air pockets and with minimal gaps on the sides offer excellent insulation. They come with a high quality chain operated mechanism. The XL50 Pleat is the latest in pleated blind technology from Europe. The wide 50mm pleat provides a totally unique look and comes in a stunning range of colours and textures.

Panel Blinds

Panel Blinds are becoming the ideal solution for sliding doors and windows. They allow you to slide the panels sufficiently to allow air or access whilst still providing privacy, shading and heat protection to the remainder of the glass. Choose from a huge range of Sheer, Translucent and Blockout fabrics. You can design them online to your exact specifications, and textures.

Custom Imported Blinds

Blinds on the net also offer an imported range of Custom-Made blinds that currently includes Roller, Aluminum Venetian and Honeycomb Blinds. With some forward planning you can have high quality blinds at very low prices. Current delivery is up to 6 weeks.

How to measure blinds

Recess Mount | Inside opening or frame [For a Window or Door]

Use this method if you have space and would like to install your blind within the Recess as shown in the **Recess Mount diagram**.

1. Measure the inside [**Width**] of the Recess from side to side in three places in millimetres as shown in the diagram. Positions **1, 2 & 3**.
2. Measure the inside [**Height**] of the Recess from top to bottom in three places in millimetres as shown in the diagram - for positions **A, B & C**.

Please advise us of the **smallest** Width and Height measurements.

Do not make any deductions, we will do this for you depending on the type of Blind chosen. **N.B.** With Roller Blinds the Width measurement at position **1** at the top is the **most important** as this is where the brackets will fit. You can supply this providing **all 3** measurements are **less than 10mm in difference**.

If in doubt please visit our site or contact: ☎ **1 300 852 912**.

Face Mount | Outside opening or frame [For a Window or Door]

Use this method if you don't have sufficient space in the Recess or would just prefer to install your blind outside the Recess onto the architrave or wall as shown in the **Face Mount diagram**.

1. Measure the [**Width**] in millimetres either from architrave to architrave or allowing for your desired overlap on both sides.
2. Measure the [**Height**] in millimetres from architrave to architrave or allowing for your desired overlap at the top and bottom.

N.B. The Blind will be made to these exact measurements, **NO** deductions will be made.

If in doubt please visit our site or contact: ☎ **1 300 852 912**.
